

Carefield is COVID FREE!

Keeping EVERYONE at Carefield
Safe and Healthy

How we've remained COVID FREE:

- **Innovative disinfecting process** with use of fogging machine to maximize surface contact
 - o Our use of the fogging method to disinfect our community common areas allows us to kill all forms of Corona Virus including COVID-19.
 - o It maximizes contact surface that normal cleaning cannot do.
 - o It also helps our ventilation airway systems provide cleaner air to our residents.
- **Our skilled and efficient staff clean multiple times** throughout the day following stringent guidelines.
- **We monitor all employees daily** and provide supportive systems to encourage them to stay home if feeling ill.
- **Our hiring process involves COVID testing;** allowing us to ensure healthy staff and sufficient care support for our residents.
- **Our process for new residents** also ensures and promotes a COVID free environment.

Keeping our environment safe from the dangers of COVID-19 is not our only priority. We want to preserve our Carefield culture of active lifestyles and positive engagement!

How we continue to provide a higher quality of life for our residents:

- **We offer a safe environment** on-site to visit with loved ones providing ample amount of time to reconnect.
- **We encourage and support the use of video conferencing** by supplying our residents with the newest technology.
- **We continue to offer a wide range of hourly activities** that promote resident engagement while observing social distancing protocols - we call it *Distant Socializing!*
- **We continue to offer an upscale dining experience** with Chef prepared meals in a setting that allows for social distancing and safe eating.
